PRODUCT ONE-PAGER

↗ Tidepath Grant Assistant

Finds, writes, tracks and reports on grants for small nonprofits — using only facts the organization has verified, with a human approving every step.

WHAT IT DOES

Discover grants
Ranks opportunities against a verified org profile and explains why each fits. Live search across Grants.gov and Candid foundation RFPs.

Funder intake
Staff confirm each funder's live guidelines, eligibility and spending rules before any writing begins.

Grounded Grant Writer
Drafts answers only from approved sources, cites every claim, respects word limits and flags missing facts for staff.

Safe portal handoff
Browser extension fills approved answers into funder portals — never checks attestations, uploads files or presses Submit.

Grant & budget tracking
Matches QuickBooks transactions to each grant's period and categories; flags out-of-period or over-budget spending.

Funder reports
Builds reports on the funder's own fiscal year, with eligible financials and evidence-backed narrative ready for review.

WHY IT'S DIFFERENT

Verified-facts only. An evidence library (outcomes reports, board-approved profile, stories) gates everything that reaches a funder.

Whole-org picture. Operating budget, grants and donations in one view — e.g. $1.24M budget, $620K covered, Q3–Q4 gap visible.

Human in the loop. Approve sources, approve drafts, approve reports. Nothing is submitted automatically.

Demo organization: Tidepath Family Alliance (Miami-Dade). Operating budget, donations and the Miami Grant Offer funder are sample data. · tidepath-grant-assistant.vercel.app
