PROBLEM STATEMENT → WHERE TIDEPATH SOLVES IT

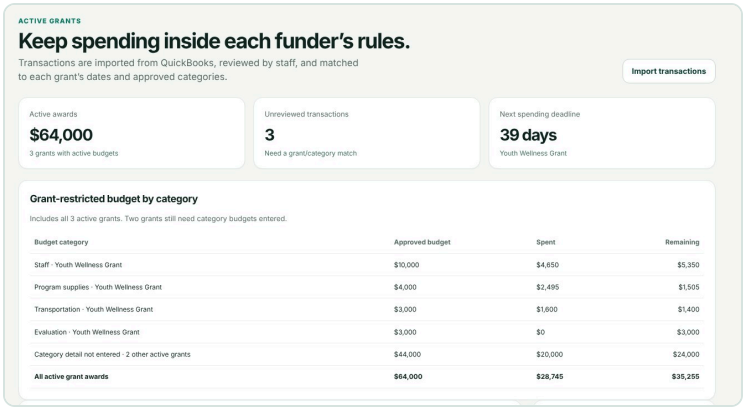

Grant work without the lost days

The problem: Tidepath's director and bookkeeper lose days to grant work because every funder has its own questions, word limits, spending rules and fiscal year. Rewriting a program description takes ~½ day; rebuilding each grant's spending takes ~2 hrs per grant per quarter; AI chat drafts invent facts.

"I just want every application to sound like us and say only what's true, and every grant spent the way its funder requires." — Claudette, Director

Application draft: 183 of 250 words, two source citations, missing school count flagged for staff.

Grants received: approved, spent and remaining per category, plus next spending deadline.

WHAT "SOLVED" LOOKS LIKE — DEMONSTRATED

JUDGE CRITERION	WHERE IT IS IN TIDEPATH	STATUS
Draft answer within the word limit, built only from approved facts, each fact sourced, gaps flagged — not filled	**Application draft & Grant Writer.** Live word counter per question (250 / 500 / 250). Source chips on every answer (2025 Program Outcomes Report, Organization Profile). "Needs staff input" banner when the funder asks for something Tidepath hasn't approved.	✓ Shown
Bookkeeper sees spent / left per category and the spend-by date, without a spreadsheet	**Grants received.** Approved / spent / remaining per category (e.g. Staff $4,650 spent, $5,350 left), funder period Jul 1 2026 – Jun 30 2027, "next spending deadline: 39 days," bookkeeper review queue.	✓ Shown
Report numbers match the funder's own dates, no manual rebuild	**Reports.** Q1 report uses the funder's period (Jul 1 – Sep 30 2026), not Tidepath's January year; a $180 charge dated before the grant period is excluded automatically until resolved.	✓ Shown

CONSTRAINTS THE FIX MUST RESPECT

CONSTRAINT	HOW TIDEPATH RESPECTS IT	STATUS
Every fact from Tidepath's own records, with its source	Evidence library: only *approved* sources reach funder-facing text; unverified stories are held back from drafts and ranking.	✓
Sounds like a person at Tidepath	Profile stores a "writing voice" (plainspoken, warm, accountable) and approved program language reused across funders.	✓
Staff approve everything	Approve source → approve draft → export report for staff review. Nothing leaves without a click.	✓
QuickBooks stays	Transactions import from QuickBooks and are re-mapped to each grant's categories and dates.	◖ Simulated import
A person submits on funder websites	Safe form-filler extension fills approved answers only; never ticks attestations, uploads, saves or presses Submit.	✓
Low-cost, non-technical	Browser-based web app; one profile powers discovery, drafting, tracking and reports.	✓

IDEAS & STRETCH GOALS

One grant end to end	Youth Wellness Grant: discovered → funder rules confirmed → drafted from approved facts → spending tracked by category → Q1 report in the funder's year.	✓
Every grant at once & deadlines	Overview and Operating budget roll up all 3 active grants ($64K), "Coming up" deadlines, and org-wide budget coverage ($620K of $1.24M).	◖ 2 grants need categories
Category about to run over	"Needs attention" warns Program supplies is at 62% of budget.	✓
Agent drafts each report when due	Report schedule per grant and a Q1 draft ready; automatic drafting on due dates is next.	◖ Partial

Tidepath Family Alliance is a fictional Miami-Dade nonprofit; its problems come from a survey of 14 South Florida nonprofits. Budget, donations and the Miami Grant Offer funder are sample data. · tidepath-grant-assistant.vercel.app
